PROFILE

Senior Full Stack Software Engineer with over 5 years of experience designing and developing scalable web applications. Skilled in React, NestJS, Java and Node.js, with experience building microservices, distributed systems and cloud-native solutions on AWS. Passionate about clean architecture, software quality and delivering reliable products through collaboration in cross-functional teams.

PROFESSIONAL EXPERIENCE

Senior Full Stack Software Engineer

05/2026 – Present

Intramed

- Develop and maintain full-stack features for one of Latin America's leading platforms for healthcare professionals.
- Build modular user interfaces using React and a microfrontend architecture.
- Design and implement RESTful microservices with NestJS following a gateway-based architecture.
- Develop and optimize PostgreSQL databases using TypeORM.
- Integrate asynchronous communication through Apache Kafka and optimize performance using Redis.
- Deploy and maintain cloud-based services on Amazon Web Services (AWS).
- Drive technical SEO improvements, enhancing indexing, metadata, structured data and overall search engine visibility.
- Collaborate with Product, Design and QA teams in an Agile environment to deliver scalable and high-quality solutions.
- Participate in code reviews, architectural discussions and technical decision-making.

Software Engineer

03/2025 – 03/2026

Mercado Libre

- Develop and maintain internal applications used for logistics pricing and carrier rate configuration across multiple Latin American markets.
- Contributed to the migration and integration of the pricing management system from Kangu, adapting it to Mercado Libre architecture and standards.
- Participate in the development of a centralized logistics contracts platform acting as the single source of truth between commercial agreements and operational configurations.
- Build frontend features using React and internal UI libraries.
- Implement backend services using Java with Maven/Gradle in distributed and high-traffic environments.
- Improve operational workflows related to carrier rate configuration and validation.
- Work closely with product, logistics and operations teams in agile environments.

Software Developer

03/2023 – 02/2025

Siloreal

- Develop web applications for crop management using AgTech solutions.
- Implement satellite monitoring systems for silo bag management.
- Integrate real-time data collection using soil and climate sensors, and develop an automated alert system for silo bag owners.
- Create a communication network to enable information exchange about silo bags among farmers.
- Propose and implement improvements to increase agricultural operation efficiency and sustainability.
- Use technologies such as React, React Native, Node.js with Express, MySQL, and AWS to build the solutions.

Software Developer

05/2022 – 02/2023

Multiradio

- Manage the company's logistics control and management application to ensure smooth operations.
- Analyze customer feedback to identify areas for improvement in the application.
- Implement enhancements based on feedback to improve organization and efficiency.
- Use technologies such as HTML, CSS, JavaScript, C#, .NET, and SQL Server to maintain and improve the application.

Software Developer

09/2020 – 02/2022

GOIAR S.A.S.

- Develop the Qavant tool, a human resources management platform.
- Customize the user interface to ensure customer satisfaction.
- Implement optimizations to improve efficiency for both internal and external users.
- Use technologies such as HTML, CSS, JavaScript, C#, .NET, and SQL Server to build and enhance the platform.

EDUCATION

Bachelor's Degree in Information Systems

02/2023 – 12/2025

Palermo University

University Technician in Information Systems

02/2022 – 12/2022

National Technological University

University Technician in Programming

08/2019 – 12/2021

National Technological University

SKILLS

React, React Native, Javascript, Typescript, Astro,
Microfrontends

SQL Server, MySQL, MongoDB, PostgreSQL

NodeJS, Express, Prisma, C#, ASP.NET, Java, API
REST, Amazon Web Services (AWS), TypeORM,
Microservices, Git, Apache Kafka, Redis

Agile methods and Scrum
